

Call for Posters and Demos

We are now accepting poster and demo submissions. Whereas ICCP papers must describe original research, posters and demos give an opportunity to showcase previously published or yet-to-be published work to a larger community. Submissions should be emailed to demopostersiccp2018@gmail.com . More details below.

ICCP brings together researchers and practitioners from the multiple fields that computational photography intersects: computational imaging, computer graphics, computer vision, optics, art, and design. We therefore invite you to present your work to this broad audience during the ICCP posters session. Whereas ICCP papers must describe original research, the posters and demos give an opportunity to showcase previously published or yet-to-be published work to a larger community. Specifically, we seek posters presenting:

- Recent research on computational photography previously published in another venue. This is your chance to present your work to the full computational photography audience!
- Late-breaking technical results and research, including, but not limited to, progress in computational algorithms, optical system design, and innovative applications.

In addition to posters, we also welcome:

- Demos of working computational photography prototypes and tools and software platform and/or imaging instrumentation utilizing computational photography techniques, including both research and commercial systems.
- Artwork and visual designs that relate to or utilize computational photography or video. Mediums include, but are not limited to, photographs, videos, multimedia presentations, and installations.

Submissions should include one or more paragraphs describing the proposed poster/demo/artwork, as well as author names and affiliations. We strongly encourage you to submit supporting materials, such as published papers, images or other media, videos, demos, and websites describing the work. Attachments under 5 MB are accepted. Otherwise, please provide a URL, or use an attachment delivery service like Dropbox or YouSendIt.

Please email your submission directly to demopostersiccp2018@gmail.com .

New Proposal submission deadline: March 24th, 2018

New Proposal acceptance notification: March 27th, 2018
